

FHZ zero halogen heat shrinkable wire markers

fastMARK FHZ sleeves are ideal for applications where limited fire hazard characteristics are critical.

The zero halogen material coupled with low smoke and low toxic fume emissions make this product ideal for use in enclosed space such as mass transit, marine and industrial installations. Marks are permanent immediately after printing and remain legible even when exposed to abrasion, aggressive cleaning solvents.

Inner Core Design :- Sized to the same width as the carrier allowing markers to be loaded directly within the printer.

Write-on side carrier :- You can hand write information relating to the printed markers directly on the side carrier. Also shows part number and QA code.

Perforated edges :- Remove markers without the need to remove the coloured side tapes. This lead to less mess and a faster install time.

FHZ halogen free thermal printable heat shrink tubing

fastMARK FHZ printable heat shrink tubing is manufactured from halogen free, flame retardant, heat shrinkable polyolefin tubing optimised printing for thermal printing. The compound of the tubing excludes halogens and offers excellent fire safety characteristics combined with minimal smoke emission.
